Year: 2022

CERTIFICATE

This is to certify that the **User Experience Design** Project work entitled “**Online Crime Reporting System**” by Yuraj Jadav (Enrolment No. 20162171008), Jay Kumar Sapra (Enrolment No. 20162171009) and Kushlendra Singh (EnrolmentNo. 20162171010) of Ganpat University, towards the partial fulfillment of requirements of the degree of Bachelor of Technology – Computer Science and Engineering, carried out by them in the CSE(CBA/BDA/CS). The results/findings contained in this Project have not been submitted in part or full to any other University / Institute for award of any other Degree/Diploma.

ACKNOWLEDGEMENT

User Experience Design project is a golden opportunity for learning and self-development. I consider myself very lucky and honored to have so many wonderful people lead me through in completion of this project. First and foremost, I would like to thank Dr. Hemal Shah, Principal, ICT, and Prof. Dharmesh Darji, Head, ICT who gave us an opportunity to undertake this project. My grateful thanks to Prof. Bhavesh Jain (Internal) for their guidance in project work Predicting Application Rating of Google Play Store, who despite being extraordinarily busy with academics, took time out to hear, guide and keep us on the correct path. We do not know where would have been without his/her help. CSE department monitored our progress and arranged all facilities to make life easier. We choose this moment to acknowledge their contribution gratefully.

Yuraj Jadav (Enrolment No. 20162171008))

Jay Kumar Sapra (Enrolment No. 20162171009)

Kushlendra Singh (EnrolmentNo. 20162171010)

ABSTRACT

Nowadays, much of the crimes committed were unreported to the authorities. Given this fact, the study presents the development of a Crime Management and Reporting System through online and even offline and at the same time is the active participation of the citizens. The idea draws its motivation from the inconvenience of going to the police station and personal belief of the weak investigative capabilities of the authorities to resolve petty crimes and limited spreading of crime information to the community. The project specifically looks into the crime detection and prevention. This study aims to provide an overview of the investigative process and, in doing so, identify effective and efficient approaches to the investigation and detection of the volume of crimes. The review is particularly aimed to highlight the research evidence those investigative practices and actions that are likely to lead to a positive outcome. The development of software includes the process of brainstorming and planning, requirements analysis, system analysis and designs, implementation and testing, deployment, and maintenance. The criteria of evaluation of software quality were adapted in ISO/IEC 25010:20011. This also shows that distance is also a factor that influences greatly how crimes are being handled with many crimes going unreported as a result. Crime Management and Reporting System would really help the complainant and the authority to communicate privately and easily with regards to the reported issue. In addition, it would be easier for the complainant to report a witnessed crime without the fear of getting involved in the problems because of the security that the only authorized user can see the report. Verification using Biometric is highly recommended to enhance the security of data stored in the system. This increases the restriction on access to the system, thus unauthorized users have no access to the system.

Keywords: Biometric, crime management, online, reporting system, software quality

Chapter 1

Introduction

1.1 Project Summary

In the modern world, the use of computers and Mobile phones are becoming rampant. More so, recent developments in ICT Industries has revolutionized and consequently brought about a paradigm shift in the way activities are accomplished. As a result of the crime reporting system needs to embrace these new technologies. This report has presented a simple, convenient, cost-effective, but efficient online crime reporting system with a user-friendly, sensitive and intelligible web interface. Whereby it can be accessed at any time provided there is an internet connection.

1.2 Project Scope

This website provides an architectural overview of crime management. This web site is generic. A web-based tool that enables the user to manage the crime on tasks completed as part of a project with tasks and sub-tasks. The tool includes interactivity, Functionality, Information will be stored into a database. Administrative and managerial functions will be provided including configuration projects/tasks/subtasks.

1.3 Objective

The main objective of the Online Crime Reporting System is to manage the details of Crime, Criminal, Public, Solutions, Department. It manages all the in-formation about Crime, Complaint, Department, Crime. The project is totally built at administrative end and thus only the administrator is guaranteed the access. The purpose of the project is to build an application program to reduce the manual work for managing the Crime, Criminal, Complaint, Public. It tracks all the details about the Public, Solutions, Department.

Chapter 3

System Analysis

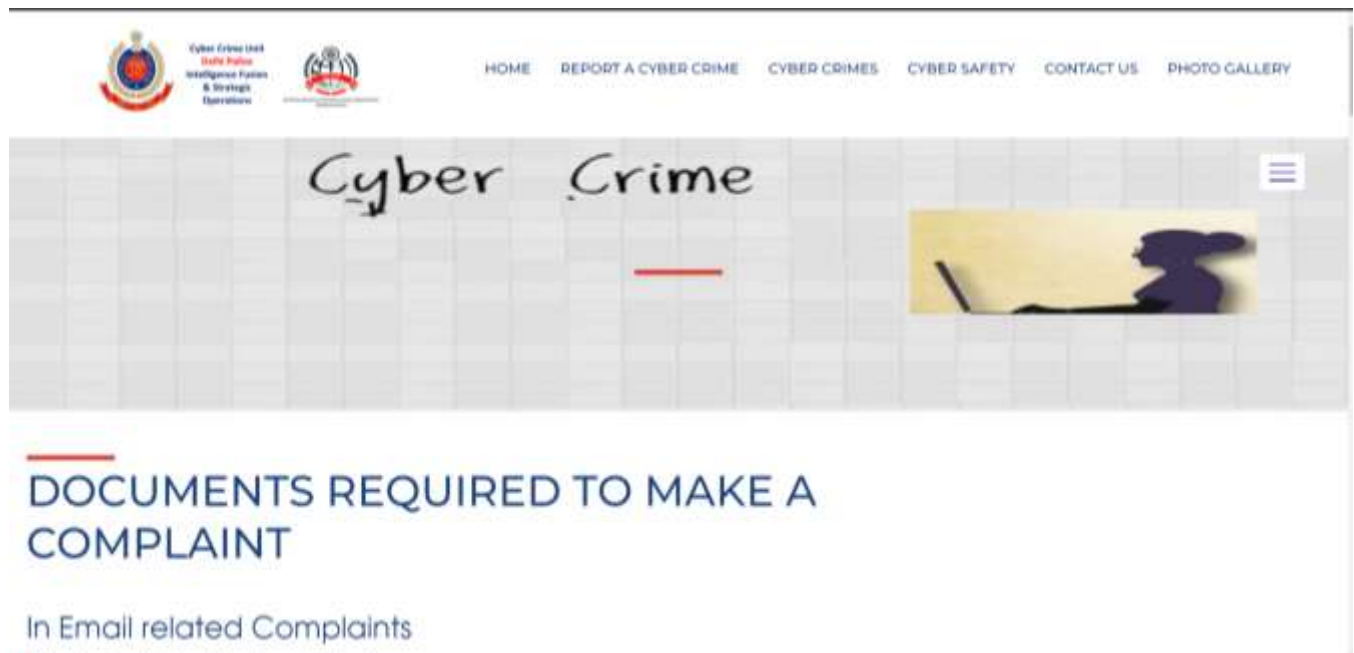

3.1 Study of Current System and Requirement of this System

3.1.1 Study of Current System

- This application does not allow users to recover their passwords.
- It is not going to allow users to ignore or remove their crime reports.
- It would also not allow changing in their profile.
- It is not fully secured as anyone can visit anyone's profile.

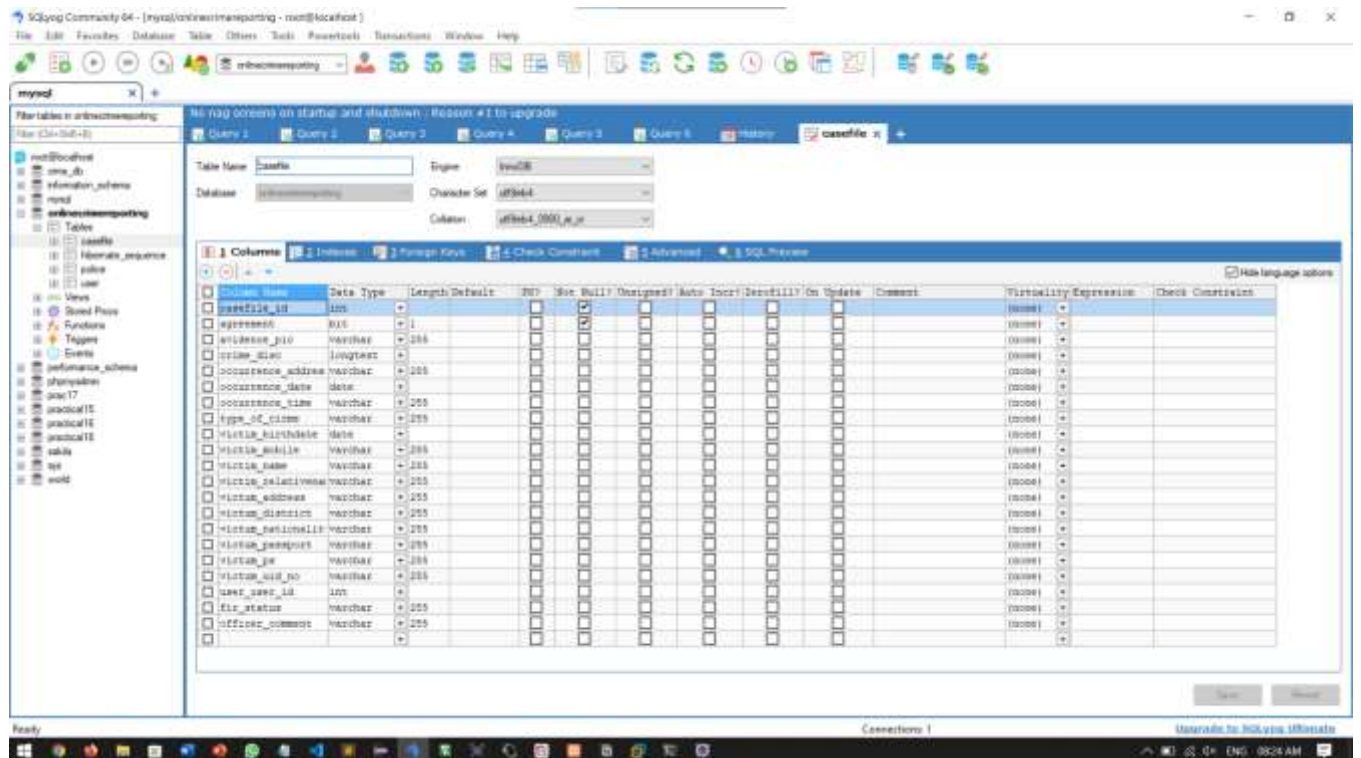

3.1.1 Study of Current System Sreenshots

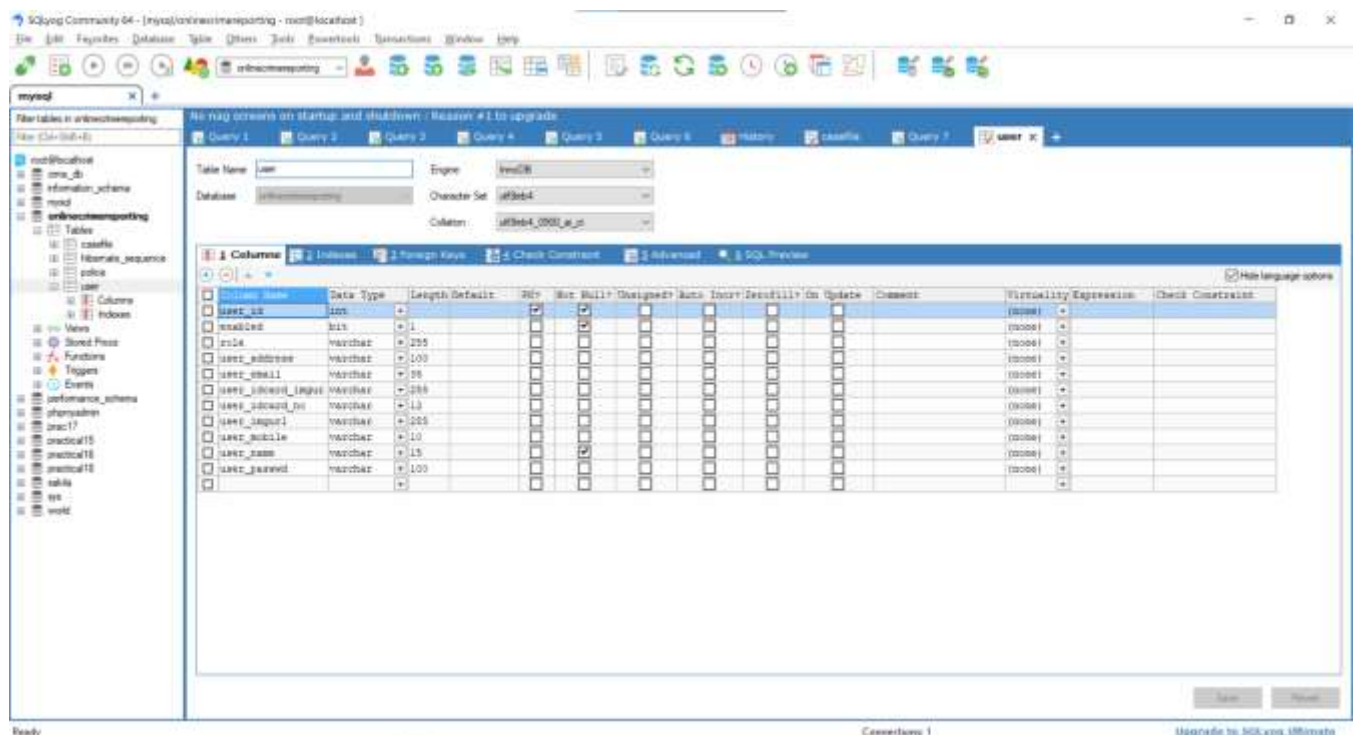

3.2 Data Dictionary

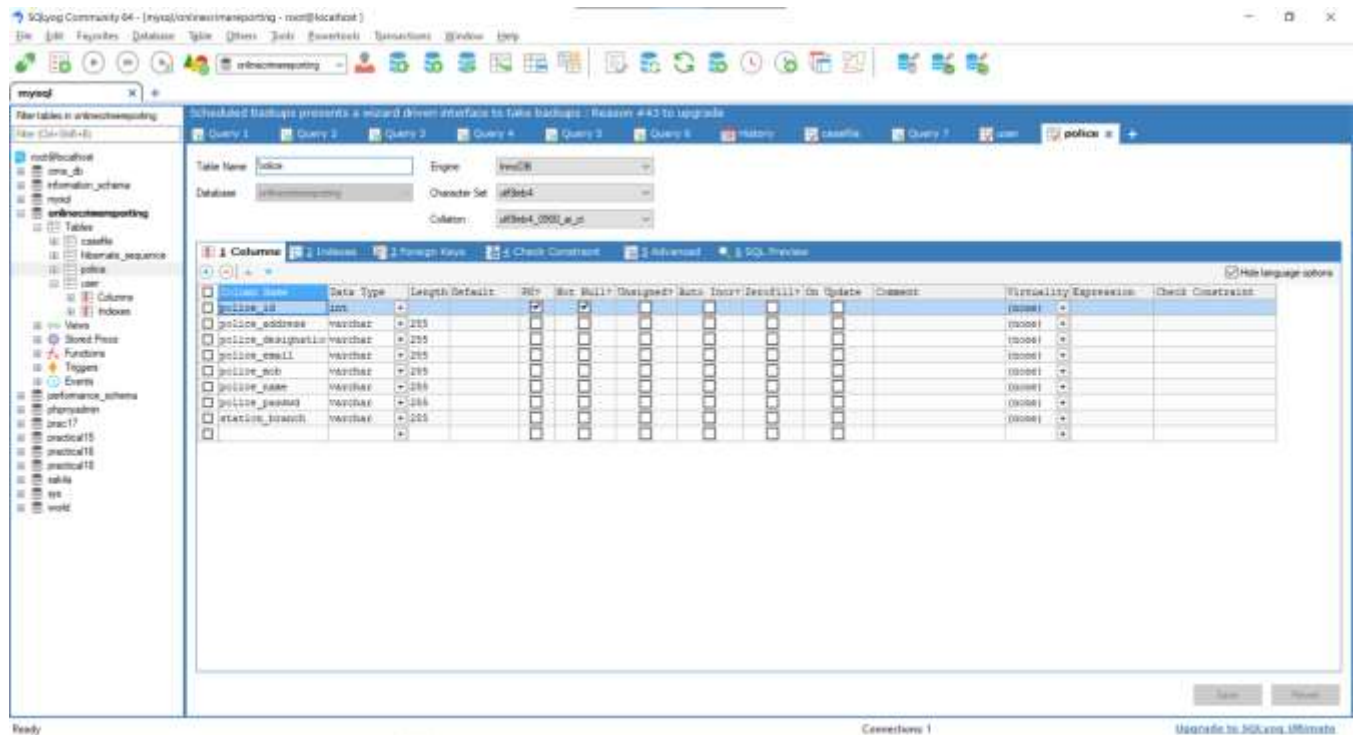

3.2.1 Casefile Data Table

3.2.2 User Data Table

3.2.3 Police Data Table

3.3 Modules and Their Description of System

TOTAL MODULE	
LOGIN PAGE.....	1
MAIN PAGE.....	2
ADMIN PAGE.....	3
USER PAGE.....	4
OFFICER PAGE.....	5

I. Login Page

- It is a basic login page where the user is allowed to access the webpage only if it's valid.
- And also we are filtering the admin and local user for more features availability(Admin Part)

II. Main Page

- The main page is divided into 3 main parts.
 1. Login User Details
 2. Question Writing Area/Text area
 3. Previous Question List

III. Admin Page

- All control of the webpage is available here from answering the question blocking user. And selecting teachers for each subject and semester.
 1. Add/Update/Display/Delete Police Officer(Police Station)
 2. Add/Update/Display/Delete Citizen(User)
 3. Update/Display/Delete Complaint
 4. View/Delete Complaints Status
 5. View/Delete Emergency Complaint
 6. View Query
 7. View Feedback

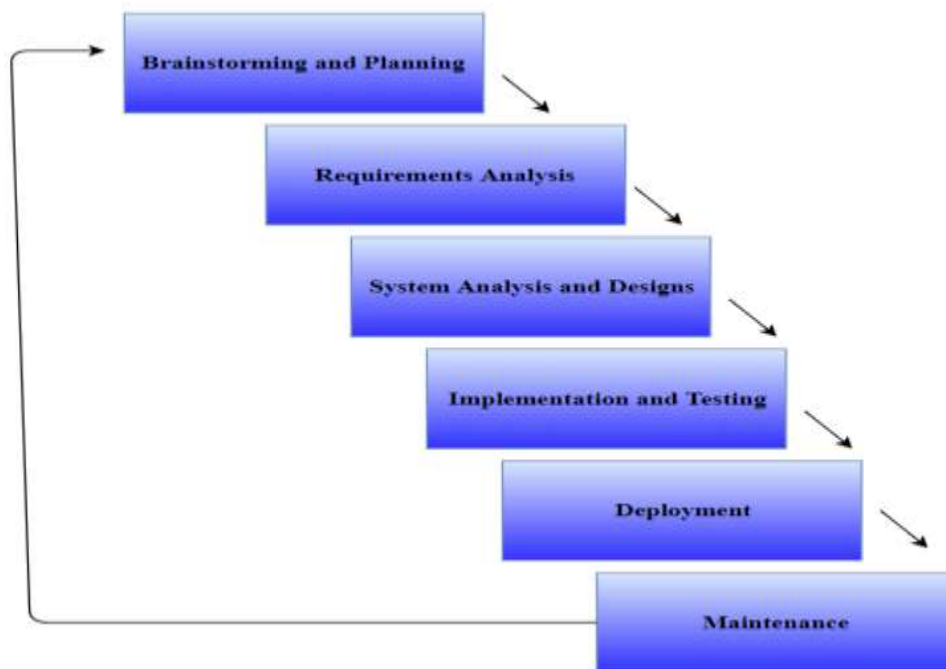

IV. User Page

- The user can register himself and register fir and can update his profile and can track his fir status.
- 1. Registration and login page
- 2. Notify to your near police station
- 3. Awareness about cyber hygiene
- 4. Complain anonymously
- 5. Add/update/delete complains
- 6. Uploading system for files like photos, pdf, etc.
- 7. Proper guidance to problem solutions
- 8. Tracking to your complain

5.1.1 Home page

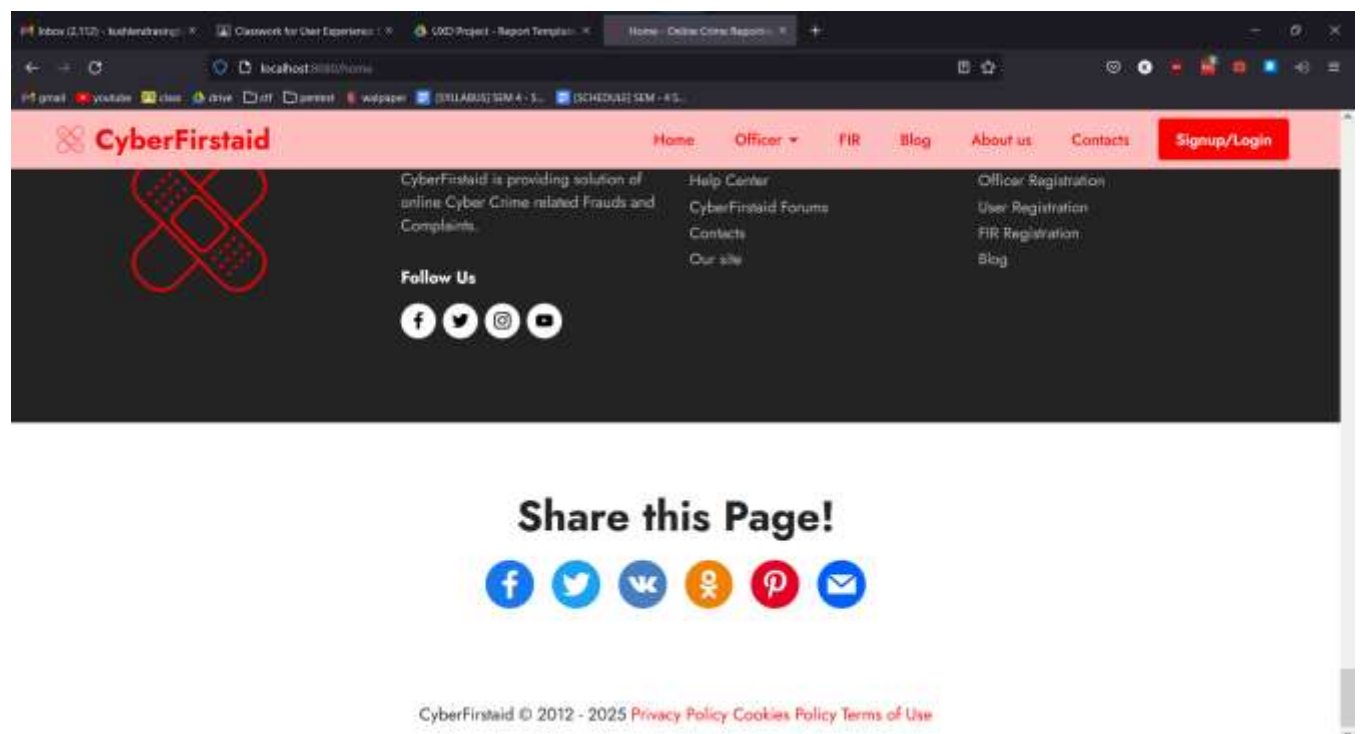

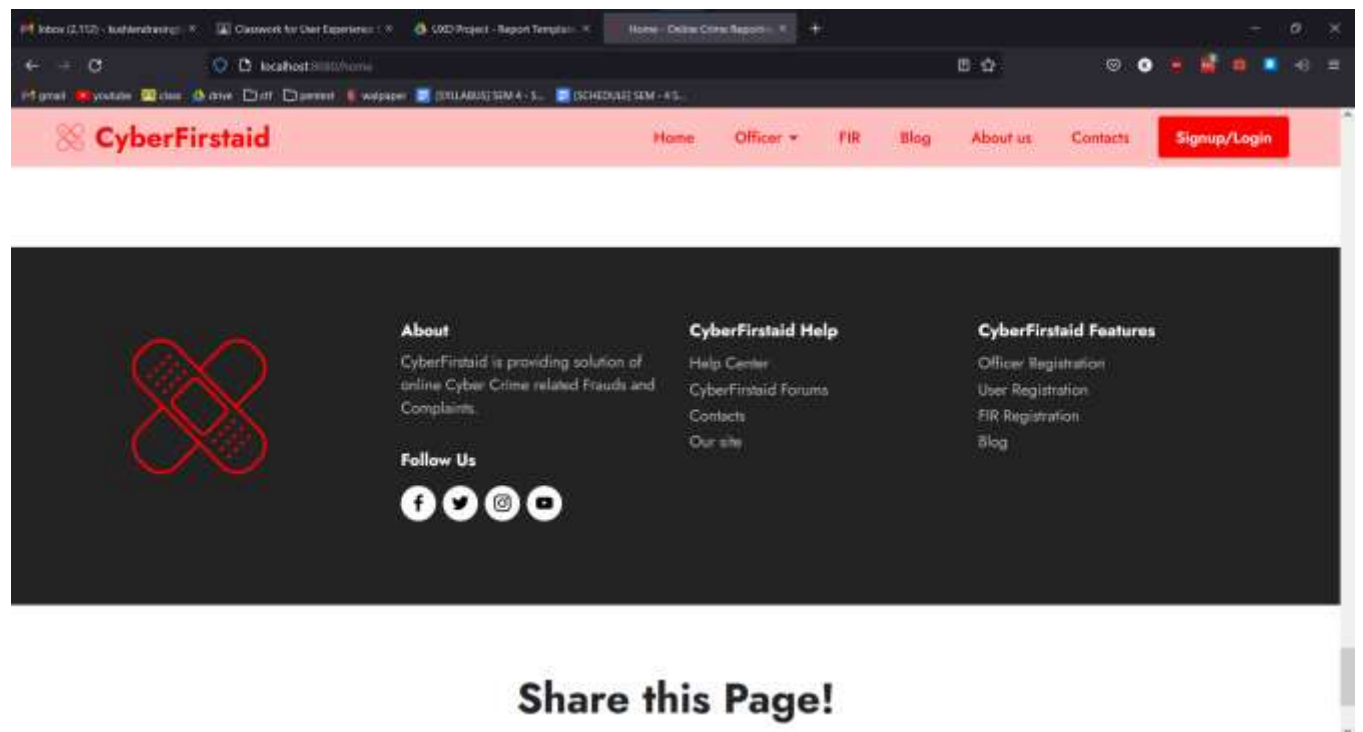

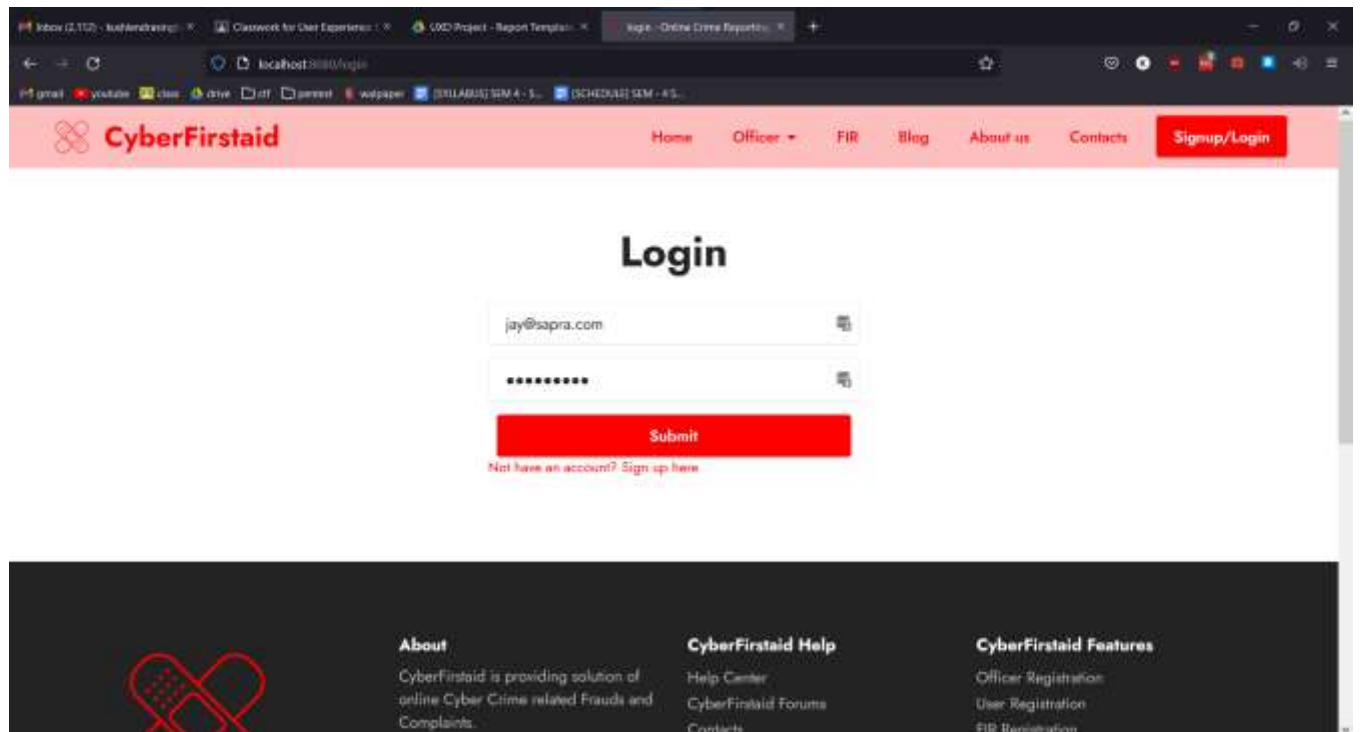

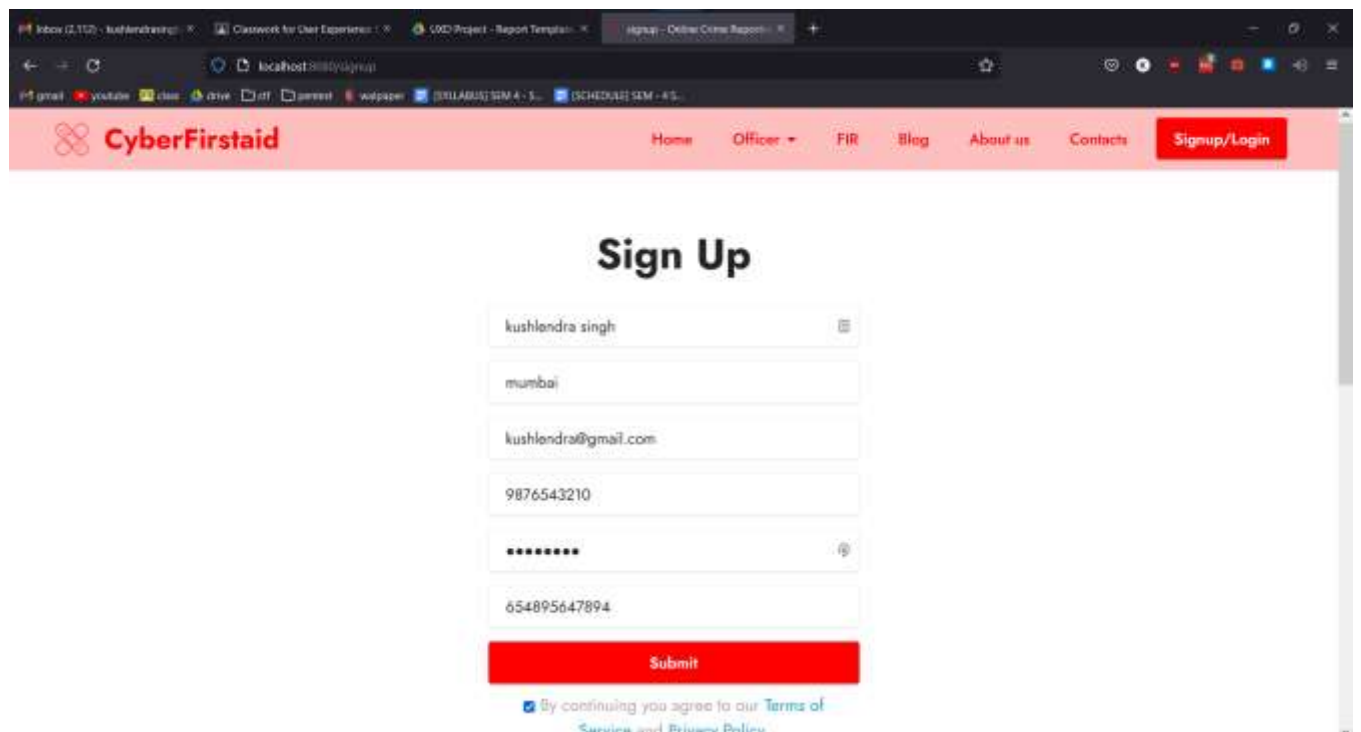

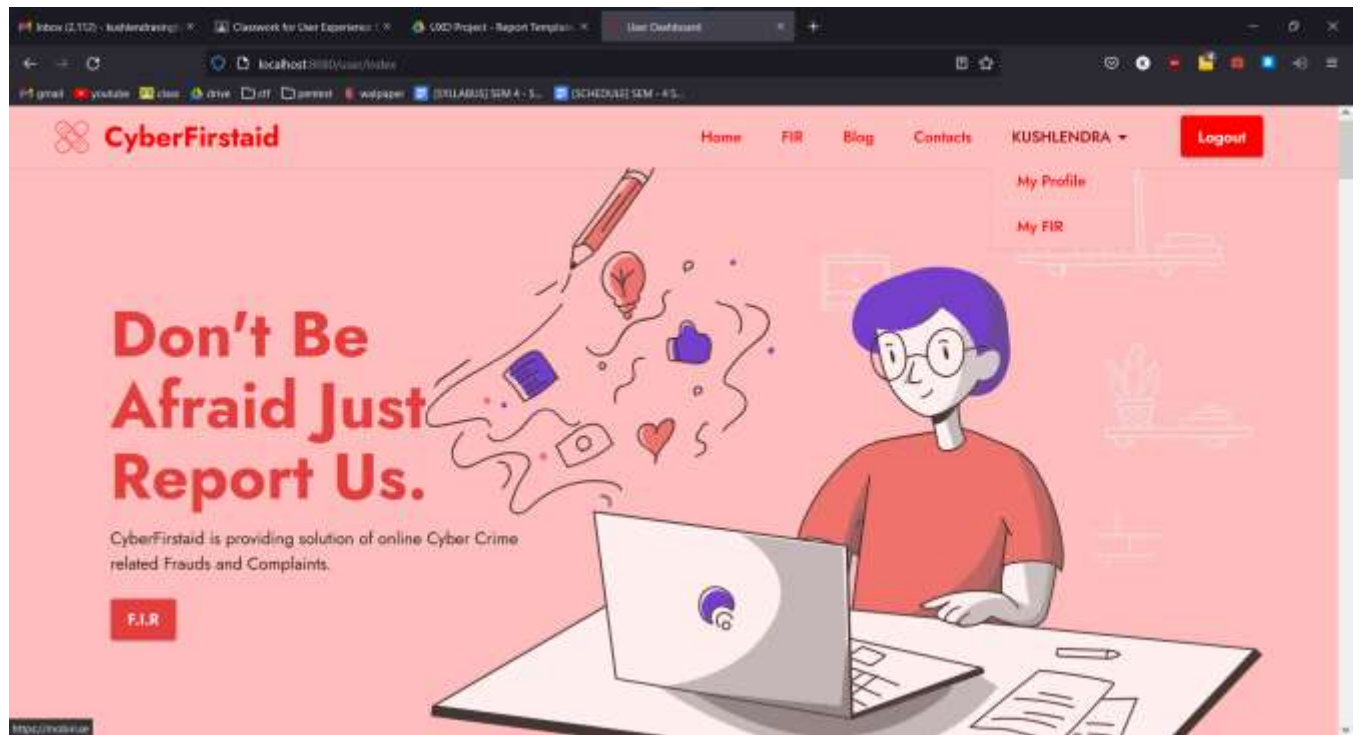

5.1.2 Login page

5.1.3 Signup page

5.1.4 User Dashboard page

5.1.5 FIR Register page

The screenshot shows the 'F.I.R.' registration page of the CyberFirstaid website. The browser's address bar displays 'localhost:3000/View/fir'. The website has a red header with the 'CyberFirstaid' logo on the left and navigation links for 'Home', 'FIR', 'Blog', 'Contacts', and a user profile 'KUSHLENDRA' with a 'Logout' button on the right. The main content area has a white background with the title 'F.I.R' in large, bold, black letters. Below the title, there is a registration form with the following fields: 'Full Name (As per Identity card issued by Gov.):' with a text input field containing 'Full Name (As per Identity card issued by Gov.)'; 'Father's/Husband's Name:' with a text input field containing 'Father's/Husband's Name'; 'Date of Birth:' with a text input field containing 'dd / mm / yyyy'; 'Phone:' with a text input field containing 'Phone'; 'Nationality:' with a text input field containing 'Nationality'; and 'UID No.:' with a text input field containing 'UID No.'.

5.1.6 User Profile page

5.1.7 Officer login page

The screenshot shows a web browser window with the URL `localhost:3000/officer_reg`. The page has a red header with the CyberFirstaid logo and navigation links: Home, Officer, FIR, Blog, About us, Contacts, and a red Signup/Login button. The main content area is titled "Officer Registration" and contains a form with the following fields: Name, Address, Email, Phone, Password, and Adharcard Number. A red Submit button is at the bottom of the form. Below the form, there is a checkbox and the text: "By continuing you agree to our [Terms of Service](#) and [Privacy Policy](#)."

5.1.8 Officer signup page

This screenshot is identical to the one above, showing the "Officer Registration" page. It features the same red header with the CyberFirstaid logo and navigation links, the "Officer Registration" title, the registration form with fields for Name, Address, Email, Phone, Password, and Adharcard Number, a red Submit button, and the agreement text at the bottom: "By continuing you agree to our [Terms of Service](#) and [Privacy Policy](#)."
